

To the Illinois Commerce Commission, please consider the impact that the closing of Coffeen Power Station will have on the communities in Montgomery County and the employees that work for Dynegy and their contractors. Montgomery County relies heavily on the tax revenue from Coffeen Power station for their law enforcement, county jobs, veterans assistance, and especially the school districts. They will all suffer tremendously, especially Hillsboro School District if it does close. This will also lead to less revenue for local businesses and community members relocating for better job opportunities. We are asking for a level playing field in Illinois to help supply electricity at a reasonable and stable cost for downstate Illinois. Please help support legislative proposal SB 2250.

Sincerely,

Deanna Tarter
